

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

RECENT LITERATURE.

Davie's Nests and Eggs of North American Birds.¹—The fifth edition of this useful book contains seventy-nine pages more than the preceding edition,² the increase in size being due in part to the addition of new matter and in part to the introduction of many illustrations, some of which appear to have been drawn especially for this work but most of which are borrowed from other publications. They are very unequal in character and some of them might have been omitted to advantage, the attempt to print half-tones on uncalendared paper being particularly unsuccessful.

The text is greatly improved, much that was wanting in the preceding editions being supplied in the present one. In some instances, however, Mr. Davie does not appear to have availed himself of the most recent information concerning the species treated. Thus his remarks in regard to the Labrador Duck, Cory's Bittern, the Heath Hen, Ipswich Sparrow, Philadelphia Vireo, Bachman's Warbler, and Olive Warbler by no means represent our knowledge concerning these species. *Junco hyemalis connectens* is wrongly given as *Junco hyemalis shufeldti* and *Platyptaris alaia* [*sic*] is included presumably as a North American bird but on just what authority is not stated.

These errors are obviously not of a serious nature and they detract but little from a book whose value is measured by its marked success.—F. M. C.

Bird-Nesting with a Camera.³—Since our last notice of this fine work⁴ the parts have continued to appear with regularity and we now have before us Part XII, completing the third volume. Many of the plates are fully equal to those of volume I, of which we could not speak too highly, while others have lost in clearness of definition, apparently through too great enlargement, it being presumably the author's desire to make all the plates in the book of the same size without regard to the
